

Portable Appliance Testing Site Survey

Please complete the following form to assist AKET in providing you with a more accurate estimation of labour costs for the PAT of all your electrical appliances. Add comments for any specific (spec) or proprietary items, and any items that are not easily accessible.

Company Name					Site Address:	
Site Name

Locations	Gen	PC's	Lead	110v	Spec	Comments
Please specify below any equipment you specifically do not wish us to electrically test, or disconnect from the mains supply, including the location and description of the item.						

During the test procedure of your electrical equipment, it is necessary for the AKET engineer to disconnect the equipment under test from the electricity main supply (Un-plug). The Customer 'Responsible Person' must sign below to confirm their agreement for this action.

This is to certify that the AK Electrical Testing Engineer has our permission to disconnect any piece of equipment under test from the electrical mains supply unless otherwise stated in the table above.
